CONSPIRACY THEORY: *JFK* director Oliver Stone may have been a Jerry Brown delegate, but at least half of the Democratic ticket thinks a conspiracy was behind the Kennedy assassination. Al Gore said Sunday at a question-and-answer session that he believed Lee Harvey Oswald did not act alone. "I believe that," Gore said. "I think most Americans believe that." Clinton joined Gore in favoring opening files so researchers could pursue all leads, but he said he wasn't ready to sign on to the conspiracy theory.
